

**Choose the way you need with  
NECloud service**

## NEC Cloud On Demand (NECloud) Service Complete control of your infrastructure

**N**EC Cloud On Demand Service (NECloud) offers enterprises a broad range of applications and services through Infrastructure as a Service (IaaS) options that leverage the sophisticated virtualization technology in operation of computer hardware resources so as to provide self-service based cloud computing over the Internet.

NECloud allows enterprises to have complete control of all the demand resources via the self-service portal ([www.necloud.hk](http://www.necloud.hk)) anytime and anywhere, users do not need to own their equipment/hardware, with NECloud service, which charge on utility basis, users can invest in just the right amount of technology for your current business needs. It greatly reduces the investment costs and maximizes the ROI.

**Self-service portal**  
<http://www.necloud.hk>

### Features of NECloud service:

- **High Scalability.** Cloud environments allow users to access additional compute resources on-demand in response to increased application loads.
- **Fault tolerant.** Server availability is continuously monitored, and systems failure can be detected and report to appropriate supporting technicals in no time.
- **High Availability & 99.99% uptime guaranteed.** In NEC's cloud environment, build-in systems redundancy guarantee high level of availability.
- **High Flexibility & Automated Resources Management.** NECloud service provides flexible and automated management to distribute the computing resources among the cloud's users.
- **Utility-based.** Users only pay for the services they use.

### NECloud service enables you to take full advantage of the critical qualities of the cloud:

- Access to world-class IT services on-demand through self-service portal.
- Pay-as-you-grow model allows you to scale up or down depending on your business needs.
- All hardware and data are housed in our proven secure data centers, which are mirrored, backed up for business continuity and disaster recovery.
- Highly efficient, low cost services without up-front investment.

Our packages offer various levels of memory sizes, applications and support, choose the package exactly what you need, without paying for what you don't!
